

## Release 2.17

14.01.2025.

- **UPDATE** - OpenAI & Generation Errors | BE
- **UPDATE** - Metrics Issue Resolution | BE
- **UPDATE** - Unifying naming convention
- **UPDATE** - Added “Powered by MadVoice” Label to Read More Screen

## OPENAI & GENERATION ERRORS

### What we did:

- Improved backend and frontend mechanisms for content generation, embedding, and variation polling.
- **Generation**
  - Proper handling of `NonTransientAiException` in Generator classes
  - Disabled SpringAI auto-retry mechanism.
  - Clean and optimized retry pattern aligned with our custom logic.
- **Embedding**
  - Catch and handle `NonTransientAiException` during the embedding process.
  - Ensured that the status is set to **ERROR** in such cases.
- **Variations**
  - Updated polling logic to fetch all variations.
  - Display only **GENERATED** variations in the UI.

## METRICS ISSUE RESOLUTION

### What we did:

- Addressed all identified metrics-related issues by consolidating them into a central document and tracking them via individual tickets. This ensures accurate and reliable metrics fetching and reporting.
- Excluded Story Type Posts from Metrics Import
  - Updated logic to skip STORY type posts during metrics import.
- Resolved Metrics Fetching Issue for Video Posts

## UNIFYING NAMING CONVENTION

### What we did:

- Changed naming convention in the following sections of the application:
  - Browser tab
  - Dynamic header (changing depending on which product you are)
  - Login screen
  - Reset Password mail
  - Meta connection screen
  - Diagnostics processing screen

ADDED “POWERED BY MADVOICE”  
LABEL TO READ MORE SCREEN  
VOICE

What we did:

- The “Powered by MadVoice” label is added to the Read More option/screen to ensure proper branding and visibility.
